“The first idea here in Miami, was that a building could be like a reflection of the sun and water.” / Jean Nouvel

OVERVIEW

Composed of 59 individually designed waterfront residences around a glittering lagoon, Monad Terrace—by Ateliers Jean Nouvel—provides brilliant light exposures and expansive private outdoor space sheltered by climbing gardens of native plants and flowers.

Nouvel artfully directs the play of reflections and water throughout the project, bouncing light deep into living spaces, while the lagoon and swimming pool draw the feeling of Biscayne Bay deep into the heart of the property, creating what Nouvel has dubbed “the reflection machine.”

Monad Terrace’s unique honeycomb sawtooth façade captures, diffuses, and reflects incoming light, simultaneously framing views and providing privacy.

ATELIERS JEAN NOUVEL

Ateliers Jean Nouvel, under Pritzker Prize-winning principal Jean Nouvel, are the esteemed leaders in the architecture of views and light: of the art and science of luminosity and illumination, of burnished metal and polished glass, of reflection and refraction, transparency and translucency, and all that glitters in between. Nouvel’s is a practice uniquely suited to design excellence in Miami, a city of sea and sun, shimmer and shade. Monad Terrace represents world-class architecture in an optimal setting.

Absent a prescriptive style, Nouvel’s oeuvre reveals a sensitivity to place. For this remarkable body of work—literally visionary in its concern for what it means to see and be seen, for screening and sheltering, and especially for his insight into light—Nouvel has been recognized during his distinguished career.
